

## We Heart: Shabby Apple Aprons

Move over, June Cleaver. You can get your bake on with the darling aprons from the **Shabby Apple** collection. Not only do the aprons protect your clothing, but they also keep you looking decidedly 1950's adorable while you whip up your favorite dessert. We love the *Strawberry Shortcake* (pictured at left), and the line features other delicious aprons, such as *Caramel Apple Pie*, *Key Lime Pie*, and *Blueberry Pie*, among many others. After donning our apron, we were immediately inspired to bake an apple crisp. You will be, too. (\$32-\$42, [shabbyapple.com](http://shabbyapple.com))
